You can install and set up Microsoft Remote Desktop from your Windows workstation computer to a personal android device.

Article Overview

- Installing Remote Desktop on Android
  - Enable Remote Desktop on Your University Device
  - Note Your Computer Name
  - Installing Remote Desktop
  - Configuring a Remote Desktop Gateway
  - Configuring a Remote Desktop Connection

Installing Remote Desktop on Android

Enable Remote Desktop on Your University Device

1. Right click on the **Computer** option from the Start menu.
2. Left-click on **Properties**.
3. The screen will display basic information about your computer.

Enable Remote Desktop on Windows 7

1. Right Click on the Start Button and select **System** from the Menu.
2. Left-click on **Remote Settings** from the left-hand side of the screen.

The **User Account Control** pop-up window will be displayed.
1. Click **Yes** to allow the program (System Remote Settings) to make changes to your computer.
2. The **System Properties** window will open on the **Remote**.

Note

If you already have your computer configured to receive remote desktop protocol connections, e.g., you connect remotely already through a virtual private network (VPN connection), you can proceed to step 3.

3. Verify that the third radio button is selected. If it is not, select it.
4. Verify that the second radio button is selected as well as the checkbox.
5. Click **OK**

Note Your Computer Name

After completing the above steps, you will be returned to the **Properties** window.

1. Write down the information listed in the **Full computer name**.
2. This information is needed when attempting to connect to your University computer from your remote PC.

Installing Remote Desktop

1. Install the Microsoft Remote Desktop application by searching "Microsoft Remote Desktop" in the Google Play Store.
2. Click **Install** and then click **Accept**.

Configuring a Remote Desktop Gateway

1. Open **Microsoft Remote Desktop** application on your mobile device.
   - If you are shown a screen displaying the newest update, hit the **Back Arrow** in the upper left corner.
2. Open the drop-down menu at the top of the screen, and select **Gateways**.
3. **Tap Plus**.
4. Fill out the fields as follows:
   - Gateway name: **UCONN Network**
b. Server: remote.uconn.edu
c. User name: UCONN NetID
d. Password: NetID password
5. Tap the check mark in the upper right-hand corner.
6. A remote desktop gateway should now be created.

Configuring a Remote Desktop Connection

1. Open Microsoft Remote Desktop.
2. Tap the drop-down Menu at the top of the screen and select Remote Desktops.
3. Tap Plus.
4. Fill out the fields as follows:
   a. Connection name: UConn Work PC
   b. PC Name: Full Computer Name
   c. User name: UCONN NetID
   d. Password: NetID password
5. Tap the check mark in the upper right-hand corner.
6. You should now see your PC under Remote Desktops. Tap this to connect to your PC.
