Changing or Resetting a Google Password

This article lists the necessary steps to change or reset a Google password. All undergraduate and graduate students have access to UConn G-Suite, which includes email. Staff and faculty have access to all Google Apps but not to Gmail.

Steps:

1. Navigate to password.google.uconn.edu
2. Login with your NetID and NetID Password. You will authenticate with your NetID credentials to reset your Google password. The two passwords are not necessarily the same, but can be if you choose to do so.
3. Enter your new password for your account and confirm it by re-entering it. Select submit.
4. You should see a screen that states “Success”.
5. Navigate to gmail.com and log in with your email address (for example: firstname.lastname@uconn.edu) and your new password.
