Configure Remote Desktop connections

Enabling Remote Access on Your University Computer

1. Open Control Panel and type "System" in the search box in the top-right

2. Click the top-most item - "System"

3. Make note of the "full computer name" under the "Computer name, domain, and workgroup settings" section, you'll need this later to connect to your computer

   Click "Remote settings" on the left side of the window
4. A new window will open. Select “Allow remote connections to this computer” in the "Remote Desktop" section. Confirm that "Allow connections only from computers running Remote Desktop with Network Level Authentication (recommended)" is checked. Click "OK".

Connecting to your University Computer from a Windows Computer

1. On Windows 7, open the Start Menu and navigate to "All Programs" > "Accessories" > "Remote Desktop Connection". On Windows 8 or 8.1, open the Start Screen, click the Search icon in the upper-right corner and type "Remote Desktop Connection". Click the first item in the list. On Windows 10, open the Start Menu, click "All Apps", then navigate to "Windows Accessories" > "Remote Desktop Connection"
2. Click the “Options” or “Show Options” dropdown button
