Authenticating Using an SMS Text Message

This article is for faculty, students, and staff who wish to authenticate via a text message on their mobile phone.

1. On the 2FA authentication screen, click **Enter a Passcode**.
2. A new text field appears, the **Enter a Passcode** button turns into **Log in**, and a blue bar will appear at the bottom with the button **Text me new codes**.
3. Click **Text me new codes**.
4. You will receive a text on the mobile phone you have registered with Duo. Note: Once a code has been generated, it will only work once.
5. Type the 6 digit code in the text you receive into the website you are logging into, and click **Log in**.
