Connecting to the UConn-Guest Network on MacOS

Students, staff and faculty will be able to connect to the UConn-Guest network wirelessly on MacOS.

⚠️ If you are not a guest and have a UConn-issued NetID, please refer to the UConn-Secure setup guide instead.

Connecting to UConn-Guest Wireless Network in MacOS

1. Click on the network icon located to the top right of the main desktop page.
2. You will find "UCONN-GUEST" on the available network list. Select UCONN-GUEST and click Join.
3. A new screen will appear asking you to agree to the terms of the network.
4. Select Yes, I Agree and you will automatically be connected to the network.
