Connecting to the UConn-Guest Network on Windows

UConn students, staff, and faculty will be able to connect to UConn-Guest network wirelessly in Windows.

If you are not a guest and have a UConn-issued NetID, please refer to the UCONN-SECURE setup guides for your appropriate device.

Connecting to the UConn-Guest Wireless Network in Windows

1. Select the wireless connection icon located to the bottom right of the taskbar.
2. From the popup window select the UCONN-GUEST network.
3. Click on connect.
4. A pop-up window will appear asking you to agree to the terms of the network.
5. Select Yes, I Agree and you will automatically connect to the network.
