Finding the MAC Address of iOS Devices

Students, faculty, and staff can find the MAC address of iOS devices, which is needed for certain apps and programs.

1. In the home screen, open the “Settings” menu by finding and tapping the Gear icon.
2. In the “Settings” menu, find and select the General tab.
3. In the “General” tab, find and select the About tab.
4. Find the “Wi-Fi Address” listing at the bottom. This is the MAC address of the device.
