Finding the IP Address of a Windows Phone

Students, faculty and staff can find the IP address of their Windows phone, which is needed for certain programs.

Finding the IP Address on a Windows 8 Phone

1. Go to the home screen by pressing the Windows button and going to the left-most screen.
2. Find and select **Settings**.
3. Ensure you are under the **System** window and select **Wi-Fi**.
4. Select the network your device is connected to.
5. The IP address should be one of the first text boxes on that page.

Finding the IP Address on a Windows 7 Phone

1. From the home screen, slide the screen to the right, or press the right arrow button to access the application list.
2. Select **Settings**.
3. From the **System** category, select **Wi-Fi**.
4. Select the network your device is connected to.
5. The IP address will be listed here.
