Article Overview

- Configuring Remote Desktop on Android
  - Enable Remote Desktop on Your University Device
  - Note Your Computer Name
  - Installing Remote Desktop
  - Configuring a Remote Desktop Gateway
  - Configuring a Remote Desktop Connection

Configuring Remote Desktop on Android

Enable Remote Desktop on Your University Device

⚠️ Note
If you already have your computer configured to receive remote desktop protocol connections, e.g., you connect remotely already through a virtual private network (VPN connection), you can proceed to step 3.

- Enable Remote Desktop on Windows 7
  1. Right click on the Computer option from the Start menu.
  2. Left-click on Properties.
  3. The screen will display basic information about your computer.

- Enable Remote Desktop on Windows 10
  1. Right Click on the Start Button and select System from the Menu.
  2. Left-click on Remote Settings from the left-hand side of the screen.

1. The User Account Control pop-up window will be displayed.
2. Click Yes to allow the program (System Remote Settings) to make changes to your computer.
3. The System Properties window will open on the Remote.

⚠️ Note
If you see the message “You must enable the Window Firewall exception for Remote Desktop” in the dialogue box, click on the provided link. The page that pops up will give you additional instructions on how to change settings for the remote desktop connection so that it works.

4. Ratio button:
   - Windows 7
     * Verify that the third radio button is selected. If it is not, select it.
   - Windows 10
     * Verify that the second radio button is selected as well as the checkbox.
5. Click OK

Note Your Computer Name

After completing the above steps, you will be returned to the Properties window.

1. Write down the information listed in the Full computer name.
2. This information is needed when attempting to connect to your University computer from your remote PC.

Installing Remote Desktop

1. Install the Microsoft Remote Desktop application by searching "Microsoft Remote Desktop" in the Google Play Store.
2. Click Install and then click Accept.

Configuring a Remote Desktop Gateway

1. Open Microsoft Remote Desktop application on your mobile device.
   * If you are shown a screen displaying the newest update, hit the Back Arrow in the upper left corner.
2. Open the drop-down menu at the top of the screen, and select Gateways.
3. Tap Plus.
4. Fill out the fields as follows:
   a. Gateway name: UCONN Network
b. Server: remote.uconn.edu
   c. User name: UCONN NetID
   d. Password: NetID password
5. Tap the check mark in the upper right-hand corner.
6. A remote desktop gateway should now be created.

Configuring a Remote Desktop Connection

1. Open Microsoft Remote Desktop.
2. Tap the drop-down Menu at the top of the screen and select Remote Desktops.
3. Tap Plus.
4. Fill out the fields as follows:
   a. Connection name: UConn Work PC
   b. PC Name: Full Computer Name
   c. User name: UCONN NetID
   d. Password: NetID password
5. Tap the check mark in the upper right-hand corner.
6. You should now see your PC under Remote Desktops. Tap this to connect to your PC.
