Managing Objects in the Repository

Once you have ingested an object into the repository, you can manage that object and edit its MODS record.

- To edit the object either click the "Manage" tab,

- Or the "Edit MODS" tab.

The guides in this section explain in greater detail the ways in which you may edit objects and how to do so.

Contents:

- Access to Master Files
- Datastreams
• Describing Your Objects
• Enhanced Collection Pages
• IP Embargo
• Object Lock
• Regenerating Derivatives and Datastreams for Your Objects
• Selecting the Correct MODS Form
• Sharing and Migrating Objects
• Sharing Objects with Connecticut History Illustrated
